Subject: Butler Landfill Projects

Based upon the recent City Council action to defer any improvements or disturbances to the Butler Landfill cap until the City can perform some planning for the area to determine the long term approach to this area, I wish to withdraw the application for the Staging area that included the lot improvements and the water quality pond. A new application will be submitted if a disturbance to the cap is proposed.

However, it our desire to have the application for the removal of the existing rock and the addition of top soil and revegetation approved. If the City decides that this activity is not contradictory of the council resolution, they may go forward with this limited cap disturbance in the near future.

Thank you for your help in these applications.
